The band brings instruments and gear (except if gear rental is necessary) only. All microphones, cables, mic stands and power strips/-distributors have to be provided by promoter or venue.

**PA:** Must be provided by promoter or venue. PA must be powerful enough to fill the room/venue (i.e. suitable for the size of the room/venue) and create the band sound in high quality. Subwoofers are a must. Please make sure the PA is well EQ'd / acoustically well-adjusted to the room or place.

**FOH:** Mixing desk (provided by promoter or venue) must have 18 channels (minimum) and enough aux sends/returns as well as (minimum) 2 subgroups. Multicore-cable (including stage box) must be provided. One stereo 31-band graphic EQ for Main/Stereo and as many 31-band graphic EQs for monitors as suitable for stage monitoring are absolutely required. 4 (or 2x stereo) compressors/gates (ex. dbx 166XL) and 2 FX/sound processing units (ex. That makes a minimum of 15 square meters in total. Please make sure the subwoofers are not placed on the stage. Please provide a drum carpet.

**Monitoring:** 4 wedges necessary, 4-way (and separate EQs) would be cool.  
1 side field for drummer is necessary.
